

# Infor SunSystems

With information, insight and action comes growth

Many traditional financial management systems (FMS) lock businesses in to rules, structures, and business models that can't evolve to meet changing needs. But organisations need to redefine their systems on the fly, and respond to changing requirements anytime and anywhere.

While you may be able to keep up with change, the traditional FMS can't. At this time it's essential to consider a modern financial solution that is powerful enough to meet your needs today, but innovative and flexible enough to adapt as your business evolves and grows. That solution is Infor SunSystems - accessible on any device and deployed on premise or in the cloud with Sapphire Anywhere.

## Turn information into insight

Far too often, you can't access the information you need at the time you need it, either because you haven't captured the right information, or because you can't easily retrieve it. But you can take control with the unified ledger in Infor SunSystems, which gives you fast, easy access to smart transactions that deliver not just data, but detailed information with context that you define.

### Integrate information

Imagine having all ledger data combined in one place, whether it's from your general ledger, sales and purchase ledger, or even a user-defined ledger - without having to wait for batch updates or reconciliations. With a unified ledger you'll be able to close your books faster, resulting in lower costs and greater efficiency.

### Improve corporate performance

Streamline reporting and planning cycles with a single, integrated environment. Plus, make it easy for users and stakeholders to understand how your business is performing with immediate reporting and analysis. Decision-makers will get instant access to the integrated finance and operational information they need to better manage their business.

### Increase information accuracy

Capture all the detail you need in the source system, and get a clear, complete view of your business from the very start. Finally, you can use spreadsheets as they were actually intended - to analyse the data in your system, not as an alternative place to store it. Because your financial information comes straight from the source, you can be confident it's accurate and up to date.

Not only will you be able to realign analysis and reporting to meet your evolving business needs, but you'll immediately see and report on any changes you make - with smart transactions that capture the detailed data you require.

Because you'll never again be locked into a static structure, you'll be able to:

- ▶ Quickly incorporate new product lines, organisational changes, and acquisitions
- ▶ Ensure measurements and key performance indicators (KPIs) match the state of your business today
- ▶ Protect your investment for the future and limit reliance on IT for business-level needs

## Turn insight into action

When you can see the impact of all your financial transactions as well as the trends that may affect your business tomorrow, you'll have a potent strategic advantage that benefits every aspect of your organisation. Make better decisions with:

### Financial management

Get immediate access to all finance and accounting information so you can make fast and effective decisions about all aspects of financial management, including nominal ledgers, payable and receivable ledgers, consolidation, corporate allocations, multiple currencies, dual-base currencies, fixed assets, and debtor management. You'll be able to meet multiple and evolving accounting and reporting requirements because the solution is highly flexible and complies with local requirements, multiple generally accepted accounting principles (GAAP), and evolving reporting requirements such as International Financial Reporting Standards (IFRS).

### Performance management

Simplify your budgeting, forecasting, and other financial planning processes with Infor SunSystem's budgeting and planning solutions. Turn your data into meaningful information, and then deliver it to the right people, in the right format, at the right time. You'll be able to streamline consolidation, reporting, and analysis of data from third-party organisations and legacy applications, and gain insight into every aspect of the business. Plus, you'll be able to deliver financial and operational KPIs to managers at every level, helping them make better decisions, faster.

### Purchase management

Get a tighter grip on your purchasing activities with Infor SunSystem's complete web-based spending control and management solution, which you can deploy to large numbers of employees. Not only can your employees manage their own purchasing requirements, you can define rules and workflows that automate and enforce corporate policies, improving efficiency and saving money.

### Order management

Take control of your sales, purchasing, and inventory management, and integrate your operations with your partners and customers. You can configure order processes

### Infor SunSystems:

- ▶ Has 30+ years of financial experience built in
- ▶ Mirrors how you do business
- ▶ Provides one consistent data set
- ▶ Offers powerful reporting tools
- ▶ Delivers fast return on investment
- ▶ Is adaptable and flexible, enabling it to be used in over 100 vertical markets

and sequence your transactions the way you want to, access any associated documents you need, and automatically update your ledger and inventory in real time.

### Professional services automation

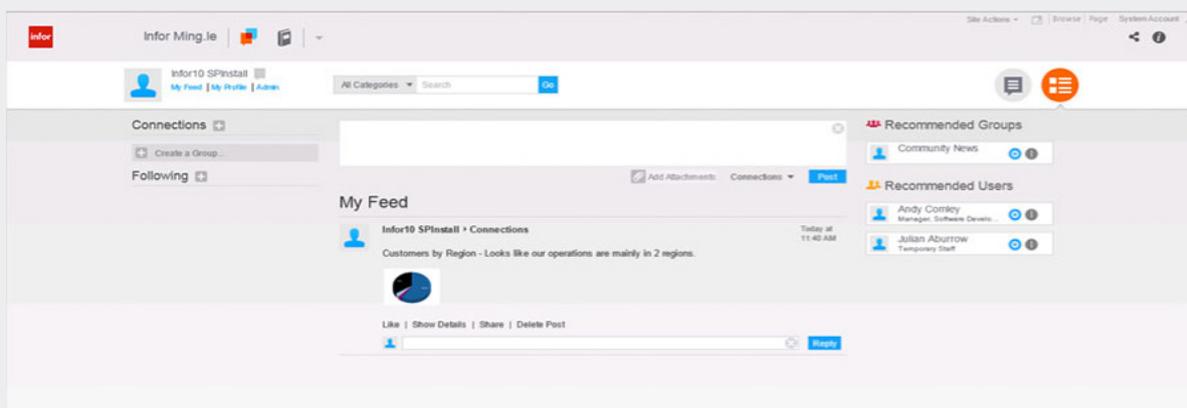

Handle project accounting, resource management, billing, and web-based time and expense management to improve staff utilisation, optimise cash flow, and increase revenue.

### Document management

With just a few clicks of your mouse, you can automatically capture, authorise, and archive business documents such as invoices, purchase orders, and statements. You'll save time, money, and storage space, and comply with increasing regulations, while supporting your company's green initiatives.

### Integration platform

You'll be able to seamlessly integrate Infor SunSystems with any other enterprise and financial systems you already use thanks to Infor's Intelligent Open Network (ION) middleware. It offers seamless, flexible integration with your third-party solutions, whether they are on-premise, in the cloud or both. This purpose-built solution provides a simple but powerful and scalable framework, allowing you to eliminate operational silos, dramatically improve exception management, and achieve unparalleled end-to-end efficiency.

## Turn action into growth

Meet change with confidence with Infor SunSystems, which is designed to support and reinforce today's best financial management practices and address your key challenges.

If growth means going global, it's not enough to cover basic requirements like multiple languages and currency. You'll be ready to handle all the global essentials with Infor SunSystems, which has advanced features such as four-dimensional multi-currency and parallel accounting treatments.

With SunSystems you'll get everything you need to:

- ▶ Easily accommodate change
- ▶ Manage the expected and unexpected
- ▶ Protect your investment
- ▶ Streamline processes, and make your business less complex
- ▶ Unite information across different sites, countries, business units, companies, and corporate offices

Plus, because your system supports future growth, you can:

- ▶ Expand internationally without adding new systems
- ▶ Establish a business quickly in a new country
- ▶ Standardise financial management across countries
- ▶ Comply with multiple regulatory and reporting requirements

And SunSystems just keeps improving...

With SunSystems, you'll see a marriage between modern technologies and traditional applications, so you get the best of both worlds. You no longer have to sacrifice usability and convenience for the sake of functionality.

### Social business

Take collaboration to new heights with a centralised space for communications, making information that previously got lost easy to share, access, and audit.

### User experience

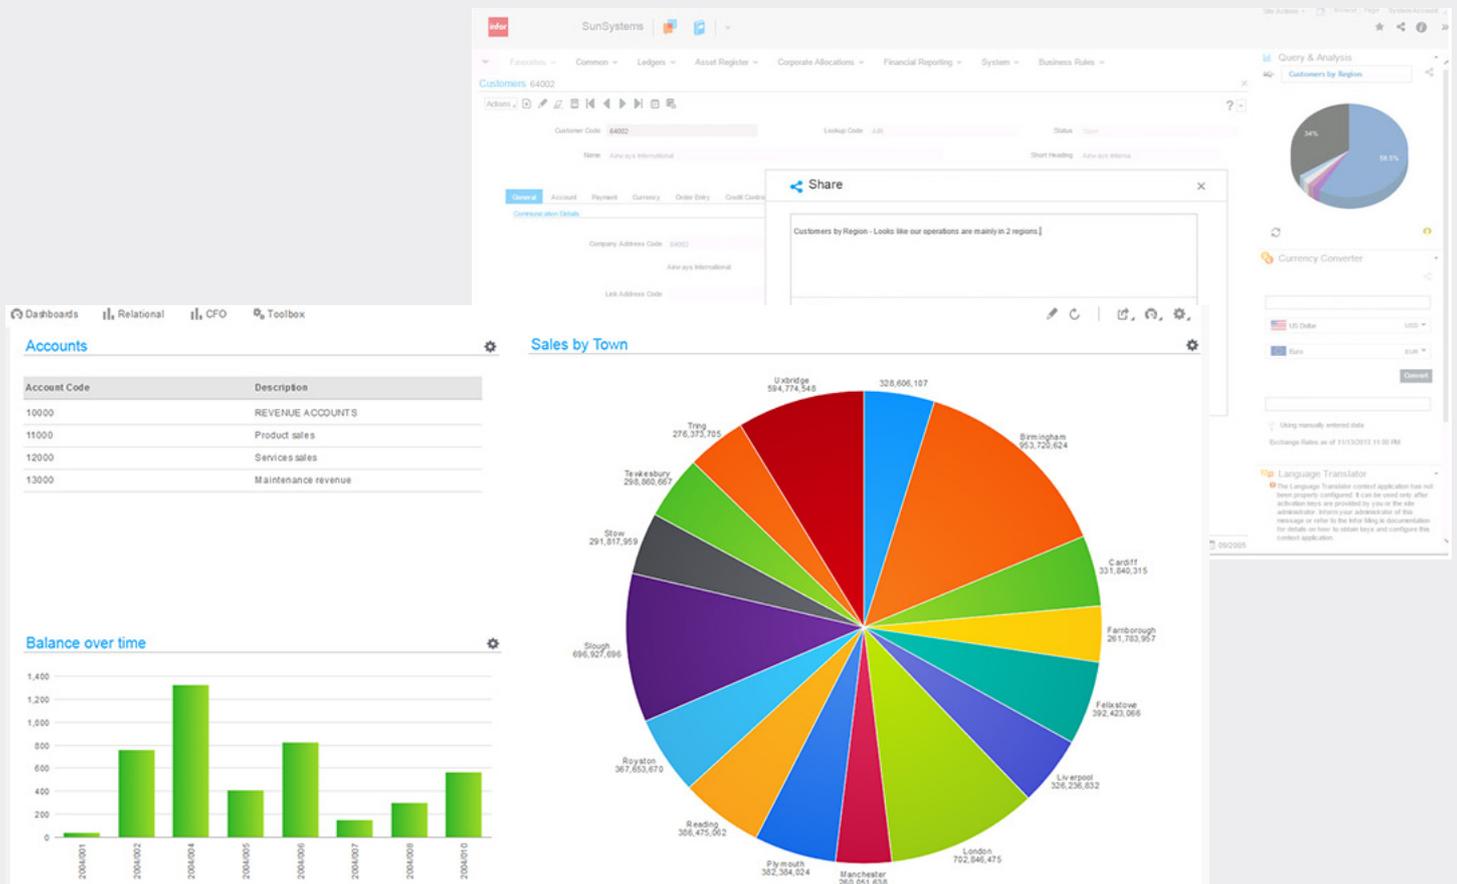

Get a consumer inspired user experience in a business environment with a system that's as easy to use, attractive, and inspiring as personal technology.

### Cloud

Get unparalleled flexibility with our Sapphire Anywhere cloud deployment options for SunSystems. You have absolute choice in the way you deploy your data, making your information both portable and secure.

Sapphire has a unique agreement to sell Infor SunSystems internationally, and is recognised as the Global Number One partner for this product.

We offer 24x5 support as standard and have extensive knowledge and experience of global implementations across a variety of industries, including energy, travel, not for profit, financial services and more.
