Order Filfillment utilises the common SunSystems features to ensure integration with other members of your value chain, deliver solutions across the web and exploit the process definition features which mean you don't need to give up your operational flexibility.

Recurring Invoicing

SunSystems Recurring Invoicing enables businesses to manage contracts with customers automatically generating multiple repeat invoices automating invoice production with user-defined variation whilst allowing additional charges to be added at any time over the life of the contract. SunSystems Recurring Invoicing also calculates deferred revenue based on user-defined parameters, automatically generating the appropriate financial postings.

Key Features

- Enter all details of the contract once and invoices will be generated automatically on the correct basis based on the frequency of invoice generation required
- Manages comprehensive and complex debt collection rules
- Full Accrued and Deferred Income calculations are produced and automatic postings can be made
- Allows flexible import of contract information from other systems so ideal for time or usage based charging
- Complete integration with SunSystems

Key Benefits

- Cash flow is improved by billing in a timely manner.
- No contracts are missed.
- No more time consuming and inaccurate spreadsheets.
- Reminder letters are produced before the invoice is due, eliminating production of unnecessary renewal invoices.

Infor FMS SunSystems is a proven, customer-driven solution that meets the full range of the CFO's traditional and expanded business responsibilities today
