

Product Profile: eRemit for Infor10 Financials Business (SunSystems)

OVERVIEW

The eRemit module has been specifically designed to provide Infor10 (SunSystems) users with the ability to email payment notifications and debtor statements.

How eRemit works

- The recipient's email address is maintained within Infor10 (SunSystems)
- eRemit uses the file (.prn) produced by the Infor10 (SunSystems) Print Statement and Print Remittances functions
- eRemit uses your SMTP compliant email software
- The remittance advice and debtor statement is attached to the email in the form of a .rtf or .pdf file
- Once set up, very little maintenance is required to send remittances or debtor statements
- eRemit supports Microsoft SQL/Server 7.0 or later, Oracle 8.0 or later and will run with Infor10 (SunSystems) release 4.2.5 or later
- eRemit requires Windows 95, Windows 98, Windows 2000 or NT 4.0 workstations

You have the option to:

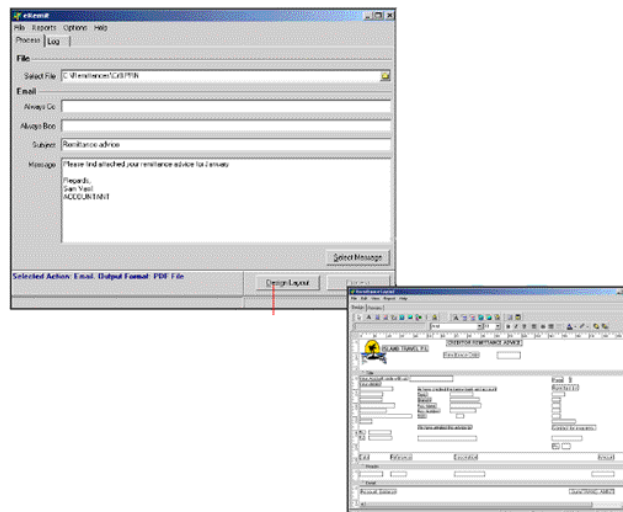

- Preview the file contents on screen
- Print a copy of the file
- Email the file

Select the Log tab to view the remittance log details

The email and the remittance file can be copied and/or blind copied to nominated recipients

Enter the details, and then process from one screen

Customise your own remittance advice or debtor statement layouts using the powerful design layout option as shown below:
