

Consultant & Business Advisors Fact Sheet: Infor SunSystems

SunSystems Testimonials

"With SunSystems we have reduced our month-end close by a very significant amount. The procedure takes us just 5 days, whereas before it was not uncommon for this process to take anywhere up to 15 days".

Charterhouse

"We chose Sapphire to support our SunSystems application as we found them to be very well regarded within the SunSystems community. Their reputation within the industry is excellent." **MRI Worldwide**

"not only have we found their solution to be extremely flexible and easy-to-use, but we have found their experience, advice and willingness to support our needs to be of the highest level". **CPM UK Ltd**

"Although some of the other products we looked at were very slick and attractive, once you started to look 'under the bonnet' you would see that some of the functionality that's crucial to managing an efficient finance operation was extremely inflexible and somewhat limited." **Citizens Advice Bureau**

About Sapphire:

Sapphire is the global leading Channel Partner for the provision and implementation of SunSystems. Sapphire was the first UK accredited SunSystems Channel Partner and today, supports over 450 SunSystems users in the UK & EMEA (Europe, Middle East & Africa). Sapphire derives the majority of its turnover from the provision of SunSystems business and accounting solutions including software and professional services (installation, implementation, training and on-going support).

As an Infor Channel Partner Sapphire are extremely focused on the SunSystems suite - a commitment which led to Sapphire becoming the fastest growing SunSystems Channel Partner in the world (2000-2001) and which helped us to achieve the World's Number 1 SunSystems Channel Partner for 2002, 2003, 2004 and 2005.

Infor SunSystems Overview

SunSystems is the leading suite of financial and business management applications employed by multinationals, medium-sized and small businesses around the world. The product family is unique in its global reach, providing a combination of international functionality and local support unrivalled by even the largest enterprise application vendors.

SunSystems financial modules fully support the operational management of a business by providing complete and instant access to finance and accounting information. The solution covers all dimensions of financial management including ledgers, consolidation, corporate allocations, multi-currency, dual-base currency, fixed assets, budget management and debtor management. It has been accredited by KPMG as being Sarbanes-Oxley and IFRS compliant and can also support multiple GAAP reporting.

Financials

SunSystems Financials provides a unified ledger, combining attributes and functionality of general, sales and purchase ledgers, cash book and analytical/project ledgers. Additional facilities provide for the needs of asset accounting, multi-currency, corporate allocations and debtor management. Extensive analysis and reporting capabilities allow users to manage their businesses better.

Procurement

SunSystems Procurement offers an effective way to streamline the purchasing process within an organization, reducing costs and improving productivity within the business.

Order Management

SunSystems provides Order Management functionality to help take control of business in a constantly changing world. SunSystems Order Fulfillment enables control through fully integrated Purchase Management, Sales Management and Inventory Management modules.

Productivity

SunSystems Productivity provides organizations with the tools to help management and employees streamline and control their time and expenses and optimize resource management of assets and employees.
