LONDON, UK – 07 April 2009. Sapphire today announced that it is to supply and implement Infor's EAM solution, to provide customers with a world class solution to manage and maintain their company assets.

Infor EAM enables manufacturers, distributors, and services organisations to save time and money by optimising maintenance resources, improving equipment and staff productivity, increasing inventory efficiency, and strengthening their ability to collect on warranty-related claims. Infor EAM reporting tools enable better decision-making to help improve future asset performance management and profitability.

In adding EAM to its portfolio Sapphire can now provide asset intensive organisations with a comprehensive solution for asset maintenance, inventory and purchasing thereby providing total visibility of all operational costs.

Ian Caswell, Managing Director at Sapphire said: "We are pleased to add this new solution to our existing offering; in today's difficult economic climate the addition of EAM enables us to offer a range of solutions that can help organisations drive down costs and release additional profits. Infor EAM integrates with Infor FMS SunSystems and SAP Business One so will be a good fit for our existing customers – which is an important factor for us, as well as opening up new opportunities in the market, where we haven't previously had a product fit."

- END -

About Sapphire Systems Inc

Sapphire is the global leading Infor FMS SunSystems partner and an SAP Gold partner – number one for SAP Business One in EMEA. Since 1986, Sapphire has offered customers wide-ranging practical expertise in selecting and implementing advanced financial accounting, business management and procurement solutions and today provides software, services and support for over 600 customers worldwide from their offices in the UK and USA. Sapphire is a founder member of the British Application Software Developers Association and was one of the first signatories of the BASDA Green Charter.
